GOOD DIGITAL PARENTING

HOW TO USE THIS FLASHCARD DECK

In today's connected world it's critical that our children understand how to be safe and responsible online.

To help you teach them the basics, the Family Online Safety Institute (FOSI) designed this flashcard deck which covers the key principles of digital citizenship.

Each card provides a simple definition and conversation-starter question to help your child learn and talk about digital citizenship.

After the conversation, we encourage you to visit www.fosi.org/parenting to learn more about everyday digital citizens using their power for good, and to find resources and tools to help everyone continue building skills.

DIGITAL CITIZENSHIP

WHAT IS DIGITAL CITIZENSHIP?

Digital citizenship includes three key skills: safety, literacy, and responsibility.

- Educate yourself on the safety and privacy services for your favorite website, social network, or device.
- Understand the Web tools you're using and where the information you access online comes from.
- Be responsible and practice good etiquette online: report abusive or harmful content, think before you post, and use your online power to make a positive impact.

What does being
a digital citizen
mean to you?

ONLINE SAFETY

BE SAFE ONLINE

There are so many opportunities to explore, create, and do good online. But it's important to keep yourself safe.

Make sure you use secure passwords that are easy for you to remember but hard for others to guess, and check for software updates regularly to ensure you have the most up-to-date security for your system.

Surf safely and remember the three C's: avoid contact with strangers, consider the content of your message, and conduct yourself responsibly online.

What are you
doing to keep
yourself safe
online?

ONLINE PRIVACY

PROTECT YOUR PRIVACY ONLINE

An important part of digital citizenship is privacy – knowing what you share and with whom. Review your privacy settings regularly and make sure you're not sharing anything online you don't want others to see, including personal information a stranger could use to identify you.

START THE CONVERSATION WITH...

What type of information do you share and how can sharing too much affect you?

ONLINE RIGHTS

KNOW YOUR ONLINE RIGHTS

Online, you have certain rights to privacy, safety, and security. You have the right to have your personal information protected and secured; to report offensive or threatening content; and to educate yourself about staying safe online.

What do
online rights
mean to you?

ONLINE RESPONSIBILITIES

BE RESPONSIBLE ONLINE

Being a good digital citizen means applying the standards of behavior we follow in the real world to the digital world.

Just like you would report an accident you saw in real life, you should report problems, abusive behavior, inappropriate images, or content online. Stand up for yourself when issues arise and help others if they are in need.

START THE CONVERSATION WITH...

What do you do when you see behavior or content online that may be inappropriate?

DIGITAL & MEDIA LITERACY

BE INFORMED, MAKE GOOD DECISIONS

Being able to judge and make decisions about the information that's accessible through your devices is a key part of being a digital citizen. With so much content just a click away, critical thinking skills – recognizing suspicious emails, websites, or online advertising – are important parts of successfully navigating the online world.

START THE CONVERSATION WITH...

How can you
tell when
something online
is suspicious?

DIGITAL FOOTPRINT

YOU ARE WHAT YOU TYPE

Your digital footprint includes more than what you post online, it also includes how you interact with others. Before you post, share, or comment, ask yourself if it's something you're okay with friends, family, teachers, or potential employers seeing or knowing about you.

Also, remember to update and look through your online profiles regularly to know what content you are sharing and with whom.

If someone found a profile of yours online, what would they say about you?

**POWER
FOR
GOOD**

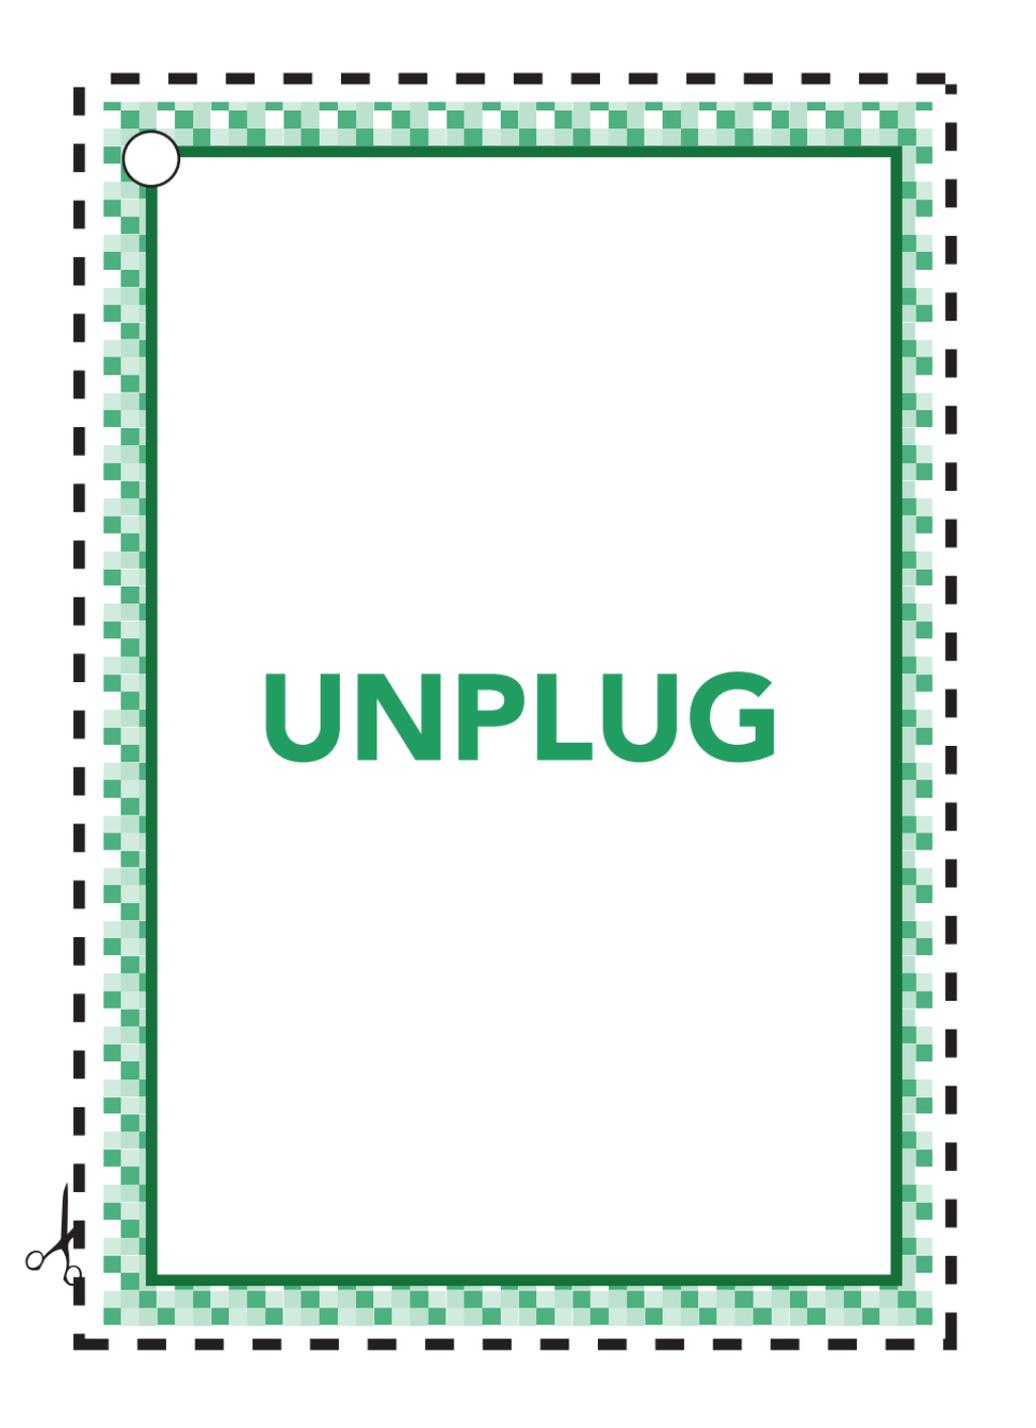

PLEDGE TO DO GOOD ONLINE

You have the power to do incredible things online. From complimenting a friend to starting a movement to drive positive change, the possibilities to do good are endless.

START THE CONVERSATION WITH...

What are some ways you can use your online power for good?

UNPLUG

TAKE A BREAK

Knowing when to stay connected, and when to turn off your device is part of being a good digital citizen. Though technology can be an amazing tool for learning, growing, and creating social change, sometimes you need to unplug.
